PROFESSIONAL PROFILE

Motivated and enthusiastic Data Science graduate from Bahir Dar University with strong knowledge of Machine Learning, Data Analysis, Deep Learning, Computer Vision, and Statistical Modeling. Experienced in developing predictive models, data-driven applications, and interactive dashboards using Python and modern data science tools. Passionate about solving real-world problems through data and artificial intelligence.

EDUCATION

Bahir Dar University — Bahir Dar College of Science
Bachelor of Science (B.Sc.) in Data Science
Graduated: June 25, 2026 | CGPA: 3.62/4.00
Relevant Courses: Machine Learning, Deep Learning, Big Data Analytics, Data Mining, Statistics, Artificial Intelligence, Data Visualization

FINAL YEAR PROJECT

Fruit Quality Detection Using a Deep Learning Approach

INTERNSHIP / INDUSTRIAL ATTACHMENT

Amhara Region Agricultural Research Institute — 2 Months (2025)

- Developed a machine learning model that improved crop yield prediction
- Collaborated with agronomists to translate data insights into actionable recommendations for farmers
- Prepared reports summarizing findings and recommendations

TECHNICAL SKILLS

Programming Languages: Python, SQL, R, SPSS
Machine Learning & AI: Scikit-learn, TensorFlow, Keras, various ML algorithms
Web & Dashboard Development: Streamlit, Flask, Gradio
Tools: Jupyter Notebook, VS Code, Google Colab

PROJECTS

Stock Price Prediction
Developed a machine learning solution to predict stock prices by analyzing historical price data, technical indicators, and market sentiment to provide actionable insights for traders and investors.

Sentiment Analysis (LSTM-based)
Built an end-to-end sentiment analysis system using LSTM networks to classify movie reviews as positive or negative, trained on the IMDB dataset and deployed as an interactive web app for

real-time predictions.

Business Sales Performance Analytics
Performed EDA and KPI analysis of sales and profit by region, category, and segment; built a RandomForestRegressor to predict profit, applied K-Means customer segmentation, and forecasted sales using Prophet.

Customer Churn Prediction
Developed a machine learning solution to predict customer churn for a telecom company with over 1 million subscribers, analyzing behavior patterns, usage statistics, and support interactions to flag at-risk customers.

CERTIFICATIONS & TRAININGS

Data Analysis Fundamentals (2024) • Artificial Intelligence Fundamentals (2025) • Programming Fundamentals (2025) • Android Development Fundamentals (2025)

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

- Community Service — Blue Nile Machine Intelligence Lab (BNMIL) Community, Mentor Team Leader

SOFT SKILLS

Teamwork • Communication • Problem Solving • Critical Thinking • Leadership • Time Management

LANGUAGES

Amharic — Native | English — Professional Working Proficiency
